CD6, p.421. Oswald literature distribution. John Coporan, WDSU, Edward Voebel.

First, this report indicates the existence and federal possession of pictures not in the evidence or files. They are potentially very important, for example, in showing other people, in showing Oswald's classmates in school, people who knew him and he might have seen on his return to N.O.

Coporan figures in the "Fairy" report, later said to have been an error, but so entirely consistent with David Ferrie. As an experienced Newsman, Coporan would have known or known about Ferrie. He is now at Metromedia, Channel 5, in NYC, where he is News Director. When Dick Townley left N.O. in November 1967, when the local NBC-Garrison-Sheridan situation was getting hot, he went not to NBC but to Coporan's employer where he was as of last week.

Note omission of the names of the debaters. This sound film, of best film quality, having been made in a studio, could be very important in identifying Oswald. It is one of the very few, perhaps the only professional and professional quality pictures of him available. Never ever referred to. The court film will likely supply both quality pictures and the faces of a goodly number of Cubans, some of whom, like Guitart, might be of interest. Certainly those with Bringuier, etc. Bringuier's name, this incident, is not once mentioned in these reports, a remarkable omission.

Note SS possession of film not in Archives or testimony.

If Voebel had old Oswald pictures, is it likely he had but one? He should be seen.

Paul: The "Fairy" report cites NBC's Mulholland.
